

E.E. Muir & Sons
AUSTRALIAN OWNED • SINCE 1927

FORESTRY PRODUCT GUIDE

eem.com.au

A HISTORY OF INNOVATION THAT EXTENDS MORE THAN 90 YEARS AND 4 GENERATIONS

When Edward Eric Muir established his business in 1927 at the Victoria Market in Melbourne, he began a family enterprise that has now grown to cover all of Australia through its many retail outlets.

After Eric Muir's retirement, his son Max continued to develop and expand the business and was joined by his two sons, Ric and Ian, in 1969 and 1975 respectively.

Under their combined direction and leadership, this family owned company has grown to be a major supplier of farm services and inputs.

E.E. Muir's great grandsons, Andrew, Stuart, James and Cameron now take active leadership roles in the company, having completed their tertiary qualifications and with many years of experience in the industry.

The Muir family are committed to continuing the excellent tradition established in the past, and are proud to offer the services of a 4th generation, family-owned Australian company to its expanding customer base.

The products and services we offer are:

- A unique and unparalleled product range in the agriculture, horticulture and forestry industries
- Experienced and solution oriented agronomists & silviculturalists
- A full suite of testing services, including soil, leaf & herbicide resistance
- Accurate advice on pesticide registrations, withholding periods etc
- Development of IPM programs & resistance management strategies
- Logistics support
- Organic and sustainable options
- Consultancy services in a broad range of subject areas

CropSure

WHAT SETS US APART IN FORESTRY

Our forestry team is recognised for bringing a high level of service & expertise to the industry. We have a proud history of challenging the norm, bringing new products to market & solving problems. We're also looking at what the future holds and have a genuine focus on improving the sustainability of silviculture in Australia.

Our dedicated forestry team includes highly experienced professionals in the following areas:

- Pest, disease, and weed management programs
- Complete nutritional program and consulting solutions
- Research & Development for forestry-specific product needs
- Replicated trials and demonstration capabilities
- Consultation on product stewardship and chemical applications

We have a proud history of leading in practical, sustainable production with a fit-for-purpose range of products and advice that provide genuine value to our clients. Talk to one of our team today about your organisation's issues and objectives and we'd be delighted to help.

FORESTRY & SILVICULTURE SERVICES

With experienced staff, E.E. Muir & Sons have forged a reputation for providing outstanding service and products backed up by reliable and professional advice.

E.E. Muir & Sons in conjunction with Campbells Fertilisers, are the Australian Forestry distributor for our Controlled Release Fertilisers (CRF).

Forestry/Silviculture is the art and science of controlling the establishment, growth, composition, health, and quality of forests and woodlands to meet the diverse needs and values of landowners and society. This includes wildlife habitat, timber, water resources and restoration on a sustainable basis.

E.E. Muir & Sons offers management support services including:

- Site conversion and establishment of tree crops
- Plantation establishment, secondary and later-aged nutrition options using our own Controlled Release Fertilisers.
- Plantation pre and post establishment herbicide advice and options.
- Plantation maintenance - weed & insect control.
- FPA compliance assistance.
- Site conversion back to agricultural purposes.

As one of Australia's leading agricultural advisory and specialty product supply companies, E.E. Muir & Sons provides silviculture agronomy advice on establishment across a wide range of soil types and topography situations that can also help you maximise the quality of tree crops to meet your businesses values and needs, specifically timber production.

Physical Properties	Soil Chemistry	Agronomic Advice
Texture	Nutrients	Pest and disease solutions
Compaction	pH	Weed management strategies for pre and post plant
Drainage	Cation Exchange Capacity	Fertiliser recommendations
Water holding capacity	Exchangeable Sodium Percentage	Compliance auditing and FPA advice

Please enquire if you are interested in our services and products so we can discuss your individual needs.

LABORATORY TESTS

E.E. Muir & Sons utilise the professional services of AgVita Analytical, an independent laboratory offering efficient and professional water, plant, soil and microbiology analyses.

THE BIG 3

FORESTRY

Maximising plantation establishment and productivity

SUSTAINABILITY & THE ENVIRONMENT

E.E. Muir & Sons is committed to improving the environmental sustainability of agriculture. We're in business for the long haul, and since the beginning, we've recognised that the long-term financial success of our business and our customers is inextricably linked to the protection and enhancement of the natural resources we rely on to produce the best quality fresh produce in the world.

We're passionate about searching the globe for new agricultural products and practices that have a better environmental footprint and sharing these with our equally passionate grower partners. Our track record speaks for itself, but it's still the future we're most focused on.

For more information regarding the E.E. Muir & Sons sustainability commitment, please visit our website: www.eem.com.au/sustainability

SUSTAINABLE FORESTRY

Growing plantations for the future

Version: July 2023. This CFA information brochure replaces all previous CFA brochures relating to this subject

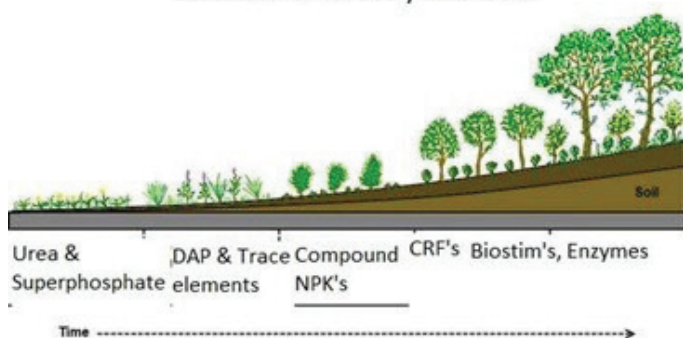

Like agriculture and horticulture, there is an increased focus on improving the efficacy of applied inputs to minimise environmental impact and become sustainable for future generations. Running parallel to this focus on sustainability has been the evolution of products and technologies available to provide nutrients to forestry plantations.

The aim of Campbells Fertilisers is to provide:

- even distribution of nutrients
- improved nutrient use efficiency
- protection of all nutrients applied from soil tie-up
- less leaching and volatilisation losses

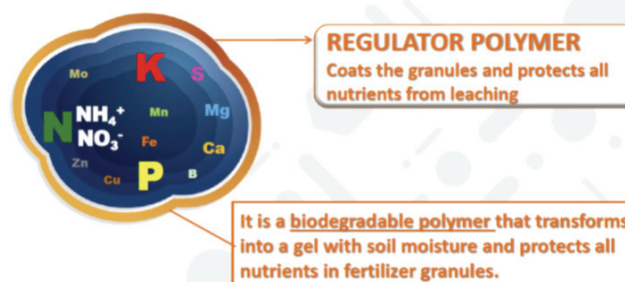

Evolution of forestry fertilisers

Campbells Fertilisers have been involved in looking at ways to improve nutrient delivery to forestry plantations for many years with the aim of not only improving tree establishment and growth but also maximising nutrient use efficiency and application efficiency. The use of compound NPK and controlled release fertilisers is proving these objectives are achievable.

Platinum Nergetic is a compound NPK with calcium and magnesium and trace elements, coated with a non-plastic biodegradable polymer that becomes a gel upon wetting. This gel has the capacity to encapsulate the soluble nutrients, for a more gradual and controlled release.

Current results on pines (*P. radiata*) are indicating that rates of 50g and 100g/tree at planting are giving 7-10% improvements in both tree height and diameter at 12 months compared to the standard blended product applied at 200g/tree.

Platinum Nergetic treatment highlights:

- Improved tree performance with significantly lower rate of fertiliser applied
- The 50g & 100g/tree fertiliser treatments compared to the standard treatment with greater nutrient use efficiency and in turn, significant labour application efficiency and reduced overall fertiliser costs.
- The 50g & 100g/tree treated area achieved these results with a significantly lower phosphorus application than the grower standard.
- Significantly less freight movements resulting in reduced freight and road maintenance costs, reduced emissions and reduced WHS risk.

Campbells Fertiliser Australasia Pty Ltd

FERTILISERS & BIOSTIMULANTS

Campbells Fertilisers Australasia is the leading force for the distribution and sales supply of specialty fertilisers in the Southern Hemisphere.

Our objective is to provide our forestry customers with the highest quality nutrition products and services allowing world class growth and production outcomes for the Forestry Industry.

PLATINUM NERGETIC

Platinum Nergetic

Granular NPKS+TE compound fertiliser with a biodegradable polymer coating. Enriched with Micronutrients and enhanced with Nergetic™ technology for your crop's complete requirements and health.

25kg, 1000kg

RUSTICA NERGETIC

Rustica Nergetic

Granular NPKS+TE compound fertiliser with a biodegradable polymer coating. Enriched with Micronutrients and enhanced with Nergetic™ technology for your crop's complete requirements and health.

25kg, 1000kg

NITRO P

Campbells Nitro-P is suitable for application via fertigation, boom-spray application to the soil or via liquid fertiliser injection into the soil at planting. The specific combination of Nitrogen and Phosphorus has an ideal fit in early crop nutrition; however, it can be applied at any stage of crop development as required.

20L, 200L, 1000L

MEGAFOL

Megafol

Keeps plant vigor in adverse environmental growth conditions. In absence of abiotic stresses it promotes the growth and development of the plants. It also improves foliar absorption and effectiveness of the products mixed together.

1L, 5L, 20L, 1000L

CAMPBELLS STARTER 8M

Campbells Starter 8M 15-11-6 is carefully formulated for controlled nutrient release up to 6 months. Each fertiliser prill is evenly coated with a Poly phenolic resin, which gradually releases nutrients into the soil for the plant to access and absorb.

20kg

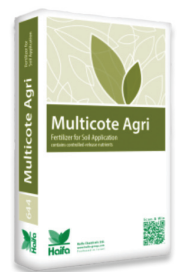

CAMPBELLS STARTER 12M

Campbells Starter 12M 15-11-6 is carefully formulated for controlled nutrient release for up to 12 months. Each fertiliser prill is evenly coated with a Poly phenolic resin, which gradually releases nutrients into the soil for the plant to access and absorb.

20kg

MULTICOTE

Multicote™ Agri has polymer coating technology, releasing nutrients to the soil in a gradual manner, according to the plant's requirements. This prevents leaching of nutrients, improved nutrient-use efficiency and allows for reduced application rates.

20kg

AGROBLEN TABLET

Agroblen Tablet is developed for open-field application in forestry, especially for new plantations. It is an easy way to supply nutrients in a controlled dosage. Containing 100% coated NPK plus trace elements, it's safe to use close to the root zone, in the planting holes

20kg

NUCLEON

Nucleon is a liquid enzyme additive developed for use with liquid fertilisers or as a stand-alone product. Nucleon enhances the nutrient availability to soil microbes and broad nutrient acquisition by plant roots resulting in improvements in soil and plant health, growth and yield.

**shelf life 24 months in optimal conditions*

1L, 5L

MAGNO

Magno is a granular enzyme additive developed for use with liquid or soluble fertilisers or as a stand-alone product. Magno modulates nutrient flow and improves phosphate uptake by converting unavailable forms of organic phosphate into plant accessible forms.

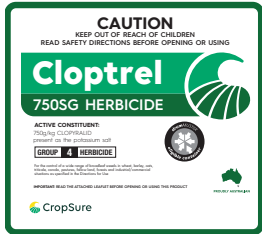

**Apply mixed with compound NPK soluble fertilisers.*

1kg, 5kg

HERBICIDES

CropSure's mission is to serve our Forestry and Agribusiness customers by offering a diverse range of high-quality herbicides, insecticides, and adjuvants at competitive prices. Our products are subject to extensive quality testing to ensure they are of the highest quality. CropSure works with key manufacturers and formulators both domestically and globally to deliver a quality product in the Australian market.

CLOPTREL 750SG

Cloptrel
750g/kg Clopyralid present as the potassium salt (Group 4)
Control of a wide range of broadleaf weeds and thistles in fallow land, forestry and industrial situations.

5kg

CLOPTREL 600SL

Cloptrel
600g/L Clopyralid present as the Isopropylamine and Monoethanolamine salts (Group 4)
Control of a wide range of broadleaf weeds in forestry situations.

5L

COMRADE

Comrade
600g/kg Metsulfuron Methyl (Group 2)
Control of blackberry & other brush species in pastures, industrial and silviculture situations.

500g, 1kg

CROPMASTER 450

Cropmaster
450g/L Glyphosate (present as a potassium salt) (Group 9)
Non-selective herbicide for the control of many annual and perennial weeds.

20L, 1000L

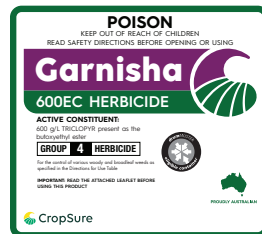

CROPMASTER ULTRA 540

Cropmaster Ultra
540g/L Glyphosate (present as a potassium salt) (Group 9)
Non-selective herbicide for the control of many annual and perennial weeds.

20L, 1000L

GARNISHA

Garnisha
600g/L Triclopyr Present as the Butoxyethyl ester (Group 4)
Control of blackberry & a wide range of woody & noxious weeds in non-crop commercial & industrial areas, forestry & pastures.

1L, 10L

HALLOTOP

Hallotop
520g/L Haloxyfop present as the haloxyfop-P-methyl ester (Group 1)
Post-emergent control of a wide range of annual and perennial grass weeds in silviculture and forestry applications.

10L

HEXASURE

Hexasure
250g/L Hexazinone (Group 5)
Control of certain broadleaf weeds, perennial and annual grasses, woody weeds in Pinus radiata, Pinus pinaster plantations and commercial and industrial areas.

10L

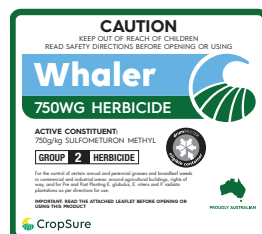

SIMAZINE 900WG

Simazine
900g/kg Simazine (Group 5)
Pre-emergence control of many annual and some perennial grasses and broadleaf weeds. Used both pre and post plant in Silviculture and Forestry applications.

15kg

WHALER

Whaler
750g/kg Sulfometuron Methyl (Group 2)
Control of certain annual and perennial grasses and broadleaf weeds in commercial and industrial areas and for Pre and Post Planting. E. globulus, E. nitens and P. radiata plantations.

2kg

HERBICIDES

E.E. Muir & Sons and Serve-Ag offer and supply a wide range of other high quality herbicide products used in the Australian Forestry Industry. We work extensively with our suppliers to ensure the products are price competitive, available, and supplied to our customer according to requirements.

ARCHER

Archer

750g/L Clopyralid present as the Dimethylammonium salt (Group 4)
Control of a wide range of broadleaf weeds and thistles in fallow land, forestry and industrial situations.

5L, 20L, 110L

ASSOCIATE

Associate

600g/kg Metsulfuron Methyl (Group B)
Control of blackberry & other brush species in pastures, industrial and silviculture situations.

500g

CAVALIER

Cavalier

240g/L Oxyflurfen
612g/L liquid hydrocarbons
100g/L N-methyl pyrrolidone (Group G)
Selective weed control of broadleaf weeds, some grasses in silviculture and forestry applications

1L, 20L

CRUCIAL

Crucial

600g/L Glyphosate present as potassium, monomethylamine & mono-ammonium salts (Group 9)
Non-selective herbicide for the control of many annual and perennial weeds.

5L - 1000L

FIREPOWER

Firepower

520g/L Haloxyfop present as the Haloxyfop-R methyl ester
Post-emergent control of a wide range of annual and perennial grass weeds in silviculture and forestry applications.

1L, 5L, 10L, 20L

GARLON

Garlon

600g/L Triclopyr Present as the Butoxyethyl ester (Group 4)
Control of blackberry & a wide range of woody & noxious weeds in non-crop commercial & industrial areas, forestry & pastures.

1L, 5L, 20L, 100L, 1000L

HEXMAC

Hexmac

750g/kg Hexazinone (Group 5)
Control of certain sedges, annual and perennial grasses, broadleaf and woody weeds in Pinus radiata and Pinus pinaster forests, and industrial weed control situations.

10kg

MAKO

Mako

750g/kg Sulfometuron Methyl (Group B)
Control of certain annual and perennial grasses and broadleaf weeds in commercial and industrial areas and for Pre and Post Planting E. globulus, E. nitens and P. radiata plantations.

500g, 1kg, 1.5kg, 2kg

STATUS 360

Status

360g/L Clethodim
534g/L Liquid Hydrocarbon solvent (Group A)
Control of certain grass weeds in forestry and silviculture. situations.

20L

WEEDMASTER DST

Weedmaster DST

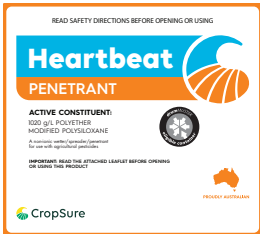

470g/L Glyphosate present as the potassium and mono-ammonium salts (Group 9)
Herbicide for non-selective for control of many annual and perennial weeds.

20L, 110L, 1000L

SPRAY ADDITIVES

E.E. Muir & Sons and Serve-Ag offer and supply our own and other high-quality Spray Additives and Insecticide products used in the Australian Forestry Industry. We work extensively with our suppliers to ensure the products are price competitive, available, and supplied to our customer according to requirements.

HEARTBEAT

Heartbeat
1020g/L polyether modified polysiloxane
A non-ionic spreader/penetrant for use with glyphosate and metsulfuron based products on certain woody weeds.

1L, 5L, 10L

TAKEDOWN

Takedown
582g/L Paraffinic Oil
240g/L Alkoxyylated Alcohol
Non-Ionic Surfactants
A spraying oil to improve the spreading and wetting of crop protection products on plant surfaces as specified in the directions for use.

10L, 20L

PULSE

Pulse
1020g/L Polyether modified polysiloxane
A non-ionic wetter/spreader/penetrant for use as a spray additive for improved penetration of several forestry herbicides.

5L

BS1000

BS 1000
1000g/L non-ionic bio-degradable surfactant.
For use with knockdown & residual herbicides.

20L

LIASE

Liase
417g/L ammonium sulphate
For use with glyphosate herbicides, to improve performance under adverse environmental conditions, and to reduce antagonism when tank mixing with flowable herbicides eg. Simazine.

20L

WETCIT

Wetcit 60SL
190.8g/L Anionic surfactants
81.5g/L Alcohol Ethoxylate
A wetting agent for use with insecticides, miticides, fungicides, & herbicides.
Plant growth regulators and nutrients.

5L

INSECTICIDES

ALPHA CYPER 300EC

Alpha Cyper
300g/L Alpha-Cypermethrin (Group 3A)
Control of Tasmanian Euc. Leaf beetle, Larve and Weevil. Autumn Gum Moth, Bronzed Field Beetle and Adults of Liparetrus spp. & Cadmus spp.

10L

SIPHON

Siphon
200g/L Clothianidin (Group 4A)
control of leaf eating insects in Eucalypt seedlings and young trees.

20L

DOMINEX DUO

Dominex Duo
300g/L Alpha-Cypermethrin (Group 3A)
Control of Tasmanian Euc. Leaf beetle, Larve and Weevil. Autumn Gum Moth, Bronzed Field Beetle and Adults of Liparetrus spp. & Cadmus spp.

5L - 1000L

SUCCESS NEO

Success Neo
120 g/L Jemvelva (Group 5)
Control of catipillar pests in Euc. plantations.

1L - 1000L
